Subject: Email from Corteva Connections about fraud protection - another follow up

In order to have the protection that they promised you have to have your cell phone on file and you also have to enable text messages from Corteva Connections to your cell. To do this go to their website: digital.alight.com/corteva

Sign in with your username and password. If you don't have an account there is a link for "new user" so that you can set up an online account. A box opens up to let you authorize text messages (I guess it will also let you enter your cell number). When I did it for myself it said my account information is being updated and to try again later. Other people have done it and it worked for them. I suppose you could also do it by phone but I didn't try. Again the number is 800-775-5955.

Good luck.
